PARENTAL CONSENT: If your student is <18 years of age, please complete the Consent for Minors, found on the SHS website

WHEATON COLLEGE, IL MEDICAL EXAMINATION FORM

This form will meet the medical exam requirement for general entrance and athletic participation. The medical examination must be within one year prior to date of entrance, unless student is an Intercollegiate Athlete, in which case the medical exam must be done 6 months or less prior to start of sport.

TO THE EXAMINING MEDICAL PROVIDER†. Please review the student's medical history, complete the medical examination form, and comment on all abnormal answers. Please add any laboratory diagnostic exams that are age/medical history appropriate.

TUBERCULOSIS (TB) SCREENING QUESTIONNAIRE

Student: please fill out and submit form to SHS as this is part of your entrance medical requirements, even if you have not had any prior testing.

Prior Testing: Have you had a TB skin test (PPD)? <input type="checkbox"/> No <input type="checkbox"/> Yes If yes, result: <input type="checkbox"/> Negative <input type="checkbox"/> Positive Date: _____ Have you had a TB blood test (IGRA)? <input type="checkbox"/> No <input type="checkbox"/> Yes If yes, result: <input type="checkbox"/> Negative <input type="checkbox"/> Positive Date: _____	
Please answer questions 1-16 and provide an explanation if the answer is "YES."	Explanation
1. Have you ever been told by a doctor or healthcare provider that you had active TB?	<input type="checkbox"/> Y <input type="checkbox"/> N
2. Have you ever taken medication for TB? Which medication(s)? What year?	<input type="checkbox"/> Y <input type="checkbox"/> N
3. Have you ever had a BCG vaccine for TB? (BCG does not exempt you from this requirement)	<input type="checkbox"/> Y <input type="checkbox"/> N
4. Have you ever been told by a health care provider that your immune system is not working right or that you cannot fight infection? (e.g. immune disorder or illness)	<input type="checkbox"/> Y <input type="checkbox"/> N
5. Have you cared for, or lived with, anyone diagnosed with active TB disease in the past year?	<input type="checkbox"/> Y <input type="checkbox"/> N
6. Have you worked or volunteered in a setting where TB may be more common, such as a homeless shelter, nursing home, group home, or prison, in the past year?	<input type="checkbox"/> Y <input type="checkbox"/> N
7. In what country were you born? _____	
8. If you were not born in the USA, since what year have you been in the USA? _____	
9. Have you lived in any other country for greater than one year? <input type="checkbox"/> Y <input type="checkbox"/> N If yes, where and when? _____	
10. Have you traveled outside the USA in the past year? <input type="checkbox"/> Y <input type="checkbox"/> N If yes, please provide the following information. Country _____ Length of stay (in days/weeks) _____ Country _____ Length of stay (in days/weeks) _____ Country _____ Length of stay (in days/weeks) _____	
11. Have you received a live vaccine in the past 6 weeks? (e.g. measles, mumps, rubella, chickenpox, or shingles)	<input type="checkbox"/> Y <input type="checkbox"/> N
12. Persistent coughing (3 weeks or more)	<input type="checkbox"/> Y <input type="checkbox"/> N
13. Coughing up blood or bloody sputum	<input type="checkbox"/> Y <input type="checkbox"/> N
14. Night sweats (soak the sheets)	<input type="checkbox"/> Y <input type="checkbox"/> N
15. Unexplained weight loss?	<input type="checkbox"/> Y <input type="checkbox"/> N
16. Unexplained, excessive fatigue?	<input type="checkbox"/> Y <input type="checkbox"/> N
17. Fever of unknown origin?	<input type="checkbox"/> Y <input type="checkbox"/> N

SHS will review this form and reply to your my.wheaton email account if you need an individual plan for further testing or treatment. Treatment may include a PPD skin test(s) or an IGRA blood test. Depending on your individual plan, these services may be available through Student Health Services.

For non-SHS Medical Providers, please use TB SCREENING SUPPLEMENT FOR MEDICAL PROVIDERS (page 6) to provide additional documentation.

TB SCREENING SUPPLEMENT FOR MEDICAL PROVIDERS

This page should be provided to your medical provider if a new PPD skin test has been administered or an IGRA blood test has been completed based on the information on the TB Screening Questionnaire (page 4). **Student please provide this supplement to your medical provider to complete if they administered/performed one of these tests. If you have prior testing or TB Treatment, please provide the official report(s).**

Patient Name _____ / _____ / _____
Last First Date of birth Student ID number

TST/PPD Date obtained _____ / _____ / _____ Date read _____ / _____ / _____ <small>Month Day Year Month Day Year</small> Results _____ Interpretation _____	If positive, refer to CDC.gov rubric. Progress to IGRA testing
Interferon Gamma Release Assay (IGRA) Date obtained _____ / _____ / _____ (specify method): Y QFT Y T-Spot <small>Month Day Year</small> Result: negative _____ positive _____ indeterminate /borderline _____ <i>Report attached</i>	If IGRA positive, progress to chest x-ray
Chest X-ray: (Required if IGRA is positive) Date of chest x-ray _____ / _____ / _____ Result: Y normal Y abnormal <i>Report attached</i> <small>Month Day Year</small>	
Medication Section: Were they advised to take medication because of the positive results? No _____ Yes _____ If yes, did they accept medication? No _____ Yes _____ If yes, what medication(s) were prescribed? _____ Date Started: _____ / _____ / _____ Date Ended: _____ / _____ / _____	

Additional Notes:

1. If BCG was received, an IGRA is preferred to a PPD.
2. If immune deficient, testing may be falsely negative and there is greater risk of progression from LTBI to active disease
3. If a live vaccine was recently received or patient is ill, consider delaying IGRA testing until 4-6 weeks after vaccination or illness to avoid a false positive result.
4. If PPD positive complete IGRA. If IGRA is positive, send chest x-ray results

TUBERCULOSIS (TB) RISK ASSESSMENT- Management of Positive TST or IGRA

All students with a positive IGRA with no signs of active disease on chest x-ray should receive recommendation to be treated for latent TB with appropriate medication. However, students in the following groups are at increased risk of progression from LTBI to TB disease and should be prioritized to begin treatment as soon as possible.

- Y Infected with HIV
- Y Recently infected with *M. tuberculosis* (within the past 2 years)
- Y History of untreated or inadequately treated TB disease, including persons with fibrotic changes on chest radiograph consistent with prior TB disease.
- Y Receiving immunosuppressive therapy such as tumor necrosis factor-alpha (TNF) antagonists, systemic corticosteroids equivalent to/greater than 15 mg of prednisone per day, or immunosuppressive drug therapy following organ transplant.
- Y Diagnosed with silicosis, diabetes mellitus, chronic renal failure, leukemia, or cancer of the head, neck or lung
- Y Have had a gastrectomy or jejunioileal bypass
- Y Weigh less than 90% of their ideal body weight
- Y Cigarette smokers and persons who abuse drugs and/or alcohol
